Product Features:

Multi-Camera View

Easily monitor 4 different cameras at one time with the multi-camera view. Share and control each camera with up to 5 users simultaneously, with the ability to connect more than 200 eLinkSmart IP cameras (and other smart home equipment) to your app at one time.

360° View & Motion/Sound Detection

360° view 1080P camera with built-in motion & sound detection can automatically capture the moment and send a notification to your smartphone or tablet. Movement tracing feature enables the camera to track and follow any motion.

Night Vision Mode & Nursery Rhymes

The built in IR-LEDs allow 24 hour surveillance up to 10 meters. With a library of Nursery Rhymes and Bedtime Stories this camera can also be a great companion for any young child or children.

Two-Way Conversations & AC Control

Enjoy real two-way audio conversations by using the active call button on the rear of the camera which activates the microphone and speakers. Use the eSmartCam app to remotely control your AC through the camera.
